Strategic Guidance

All Emphasize Importance of – Allies, Partners, Sustainment

NSS - The United States will work with regional states to keep the Indo-Pacific open and accessible and ensure that nations are free to make their own choices, consistent with obligations under international law.

NDS - The Department will advance our goals through three primary ways: integrated deterrence, campaigning, and building enduring advantages.

JWC/NMS – *Resilient Logistics in Contested Environment* key tenet

CNO NAVPLAN - *Our alliances and partnerships remain our key strategic advantage.*

The Department will prioritize a future force that is Sustainable: Securely and effectively provides logistics and sustainment to continue operations in a contested and degraded environment despite adversary disruption.

Joint & Naval Operations Doctrine

Seven Joint Functions:

- Command and Control (C2)
- Information
- Intelligence
- Fires
- **Movement and Maneuver**
- Protection
- **Sustainment**

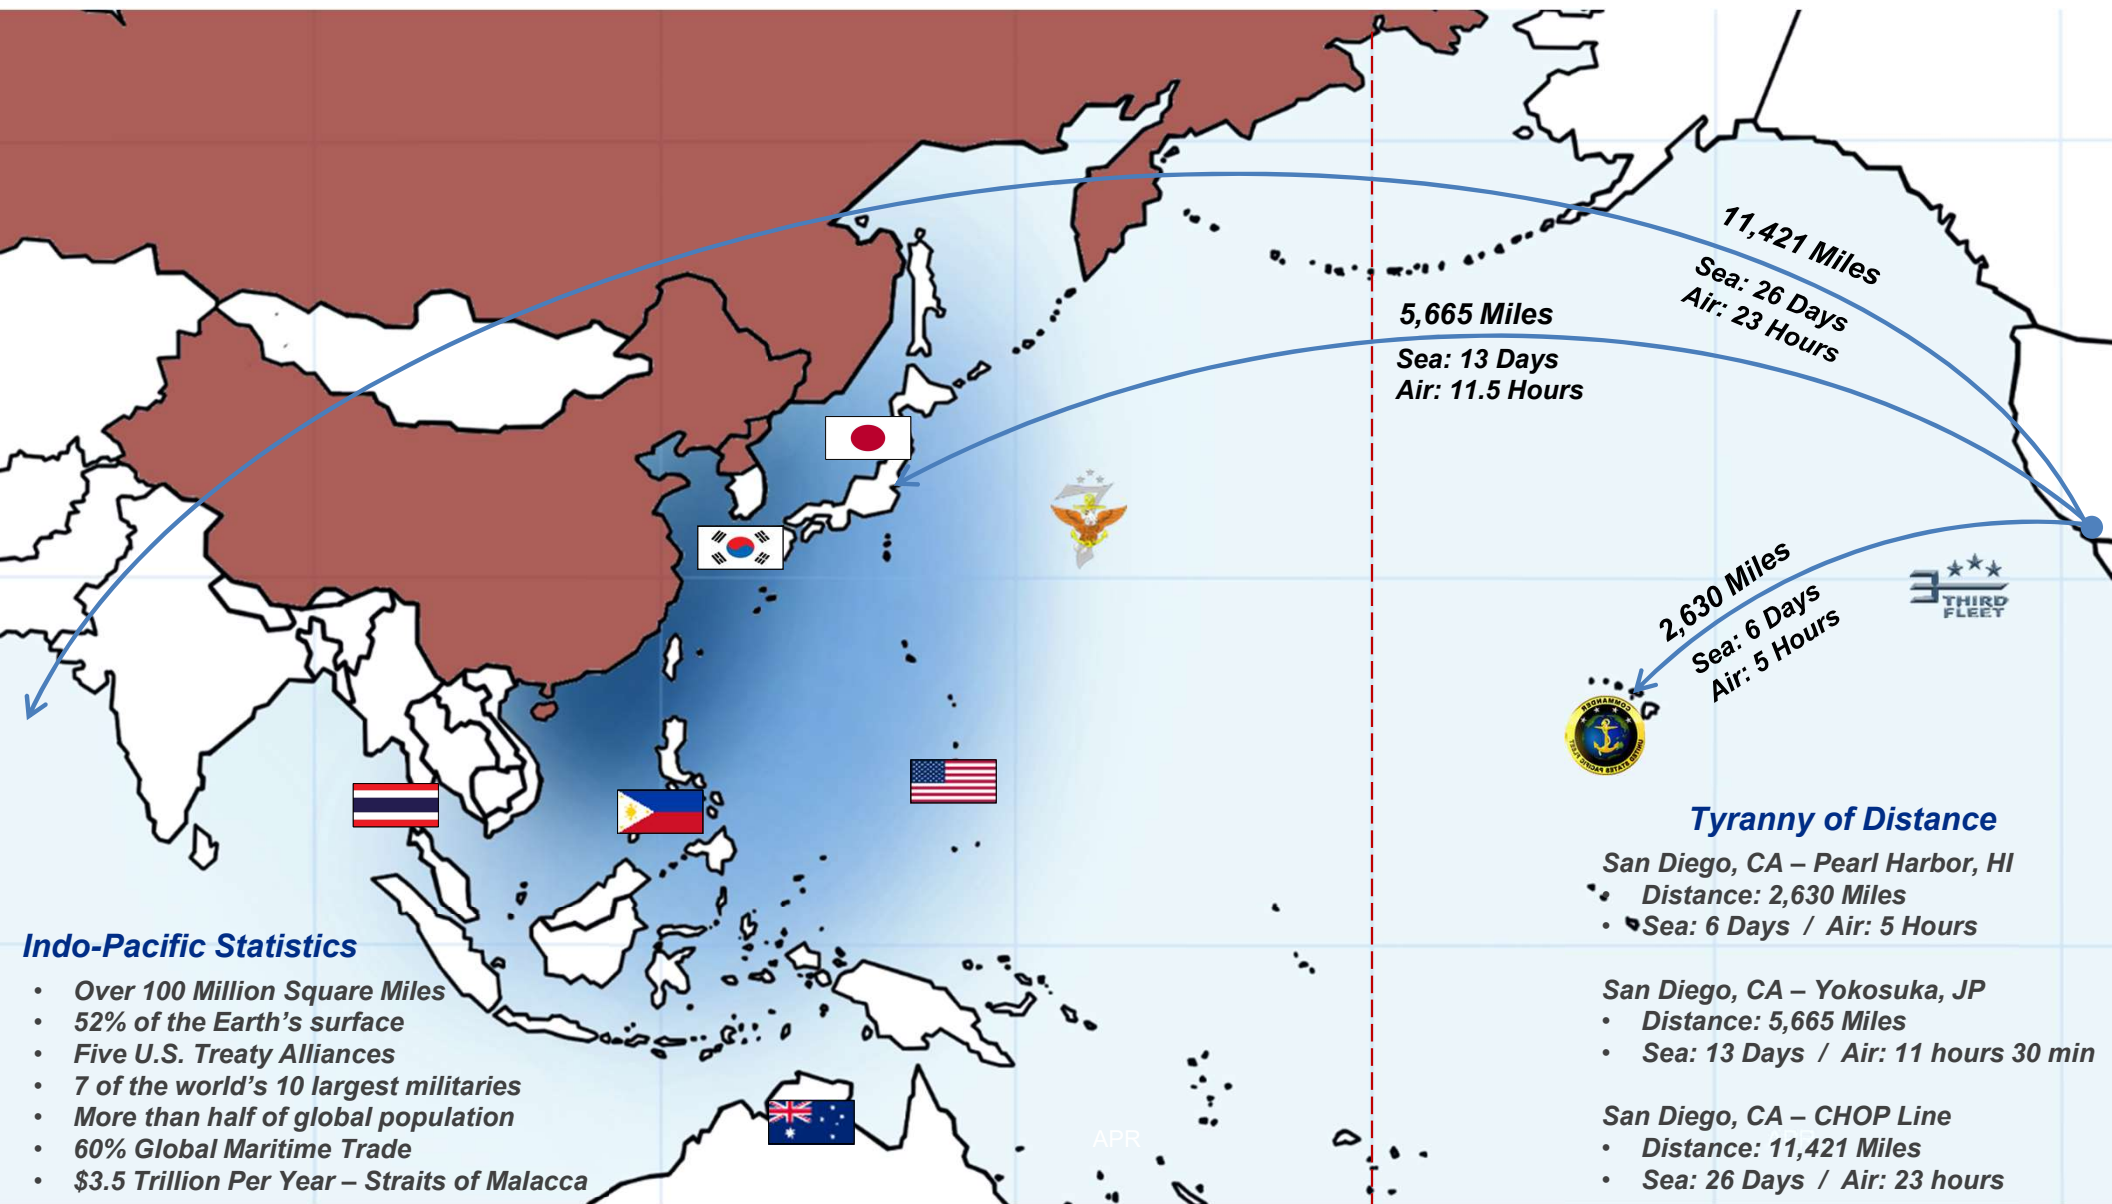

Sustainment is the provision of logistics and personnel services to maintain operations until mission accomplishment and redeployment of the force.

- Provides the JFC means for **freedom of action** and endurance and to extend **operational reach**.
